

Jaffer Machinery Division successfully supplies and commissions Resemin Jumbo Drills at Mohmand Dam Site of Descon Engineering Limited.

Jaffer Machinery Division is delighted to announce the supply and commissioning of 4 units of Resemin Jumbo Drills Mukki FF manufactured in Peru to Descon Engineering Limited for their Mohmand Dam site. The order was won by Mr. Umer Ishtiaque of Machinery Sales, in close coordination with the Principal.

The Machinery sales team was ably assisted by the Product Support team led by Mr. Musab Murtaza and Mr. Suarez Aliaga from Resemin for successfully commissioning all four Boomers Mukki FF from June 14th to 17th, 2022, and handed over the units to Descon for the operations.

The Product Support team has also initiated the training for the operational test which will go on till the end of July 2022. The support team led by Mr. Musab Murtaza is stationed at the Mohmand Dam site to supervise operations and plan recommended maintenance of these specialized Jumbo Drills. Recommended spare parts have also been arranged to support the effective utilization of these machines.
